7F2.001	2 Xenon / Illuminated Centre 12V
7F2.002	2 Xenon / Illuminated Centre 24V
702.001	2 Rotators / Illuminated Centre 12V
702.002	2 Rotators / Illuminated Centre 24V

**Description and Features**

Vision Alert high profile modern light bar with double or quad flash and illuminated centre available in selectable dual voltage at 12 and 24 volts. This 742mm light bar is suitable for commercial, utility and fleet applications.

This version of the 70 series light bar is 742mm (29") in length and has the option of Xenon or rotators along with an illuminated centre. A sturdy aluminium base and toughened polycarbonate lens come as standard within the range from Vision Alert to ensure the durability of the light bar. The free form design of the light bar ensures that the light is distributed evenly over larger areas to increase the light output by 20%. This light bar range is EMC and ECE R65 approved.
