Description and Features

LED warning lamp, or varipod, available in selectable 12 and 24 volt options and suitable for a variety of applications including trucks, trailers, off road tractors and construction.

Model 155 is a square lamp (74 x 74 mm) with a robust and compact design and a slim profile making it really appealing for all sectors. Dependant on the end use this lamp can be surface or pendant mounted and can be fitted without the need for special tools. There are two operating mode; steady stay on and single flash and they can be sequenced with other units. Model 155 features a polycarbonate lens and die cast powder coated housing to ensure durability.
